

TelstraClear has an excellent relationship with Total Link Solutions that has spanned over 8+ years,
Personally I have found that their attention to detail and friendly professional manner to be impeccable.

Total Link has proven on many occasions the ability to meet or exceed the aggressive deadlines that we
or our customers demand.

They are able to provide a level of service that extends from small data or power cabling jobs all the way
through to enterprise level structured cabling solutions, in terms of the quality of workmanship it's the
best I've seen in my 15 years tenure within the ICT industry.

In addition to these services they have proven their flexibility and skill to extend to installation of IT
racking systems and services which has resulted in a one stop shop for our business requirements.

It's a frequent occurrence for our customers to comment on the level of workmanship of the end
solution and request Total Link's contact details with a view for them to assist with other work that they
have.

I would highly recommend Total Link for all your data centre needs.

Sincerely

Wade Meyer
